

NaIP-2010

New & Innovative Products Forum
'Thinking Smarter, Working Smarter – Every Time'
TM

10th November 2010 - Canberra, ACT

Proudly Supported by **ActewAGL**

Following on from the outstanding success of the inaugural NaIP event last year, **NaIP-2010** is set down for 10th November at the same excellent venue – the Coorong Pavilion and Conference Centre at Exhibition Park In Canberra (EPIC).

The **NaIP-2010** event is designed to serve the Energy, Utilities and Electrotechnology industries leading into a smarter and more efficient operating position for the future, through the adoption of newer and more efficient products, design and work practices.

Industry Coverage Extended

Due to many requests, the industry coverage for **NaIP-2010** has increased from that of 2009 and will now incorporate all direct and support sectors of the Energy & Electrotechnology Industries as well as the General Purpose Utilities Sectors.

Delegate Support

As one of the most innovative and modern organisations in the Energy and Utility Industries, **ActewAGL** provides an excellent foundation for the extensive national delegate support already indicated for **NaIP-2010**. Delegate attendance is FREE and will concentrate solely on the people having a significant role in the selection and procurement of products and services – the *'RIGHT PEOPLE.'*

Media Support

The Australian Power & Energy News and The Australian Main Roads Construction News are the official **NaIP-2010** Media Supporters and we look forward to working with these leading national industry publications.

Adding to the valuable existing incentive awards on offer for **NaIP-2010** exhibitors, we have been encouraged by the Federal Department of Innovation, Industry, Science and Research people to introduce an Exhibitor Award for an Australian made new & innovative product. More on this later.
